- Kharkiv Financial and Economic Institute | Accounting | 1996

Summary

With a focus on efficiency, strong social skills, and flexibility, I have successfully navigated managerial responsibilities and collaborated in team settings across different organizations and roles.

Project Experience

A Kids Place Childcare | Website Redesign

The goal of redesigning the website for a children's extracurricular institution is to create an attractive and functional web resource that provides convenient access to information about programs, events, schedules, and opportunities for users (parents, children, educators). Key tasks include improving navigation, highlighting the institution's unique features, creating an appealing design, and ensuring adaptability for various devices.

Sustainability Starts with You | Website Creation

It was a team effort. 3 designers joined forces to develop a web service for sharing and recycling secondary resources. Our common goal was to promote sustainable consumption and reduce environmental impact by creating various services that take into account both environmental and social considerations.

Gelataio Insight Pro | Development of mobile application

This is a team project to control and improve the quality of small-scale ice cream production. The application is designed to provide the director, process engineer and salesman with production monitoring, raw material control, analytics and reporting.
